Simon di Brazzan features a selection of native Grape Varieties native to a small corner of Friuli Venezia Giulia. For four generations, Simon di Brazzan has had only one passion; trust. Daniele Drius inherited Simon di Brazzan and insists the wines are made with the same confidence that informed his grandparents; producing a wine that creates almost a magical experience and seduces everyone. The value of the land, composition, layout, exposure and location have found a natural equilibrium with the succession of cultivation techniques. Vines, vintages and methods may vary, but determining the character of a wine is the task of the land. Here, tradition does not hinder innovation and defending the authenticity of our vines does not prevent the wine from evolving. In these vines one can read the history, culture and thought of Man in these lands. This message is another important factor that allows us today to realize our wines with excellence.
